PROFESSIONAL SUMMARY

Senior MERN Stack Developer with 5+ years of experience building scalable, high-performance web applications using MongoDB, Express.js, React.js and Node.js. Strong frontend expertise in React.js, Next.js and TypeScript, with hands-on experience in RESTful APIs, testing, and AWS deployments with CI/CD. Mentors junior developers, works directly with clients, and delivers clean, maintainable code in Agile teams.

TECHNICAL SKILLS

- **Core Competencies:** MERN Stack Development, Full Stack Web Development, Frontend Architecture, RESTful APIs, Server-Side Rendering (SSR), Performance Optimization, CI/CD, Cloud Deployment (AWS), Unit Testing, Responsive Web Design, Web Accessibility, Client Communication, Team Mentoring, AI-Assisted Development
- **Frontend:** React.js, Next.js (SSR, SSG, API Routes), TypeScript, JavaScript (ES6+), HTML5, CSS3
- **State Management:** Redux, Context API
- **UI & Styling:** Tailwind CSS, Material UI, Bootstrap, Responsive Design
- **Backend:** Node.js, Express.js, Middleware, MVC Architecture, RESTful API Design, JWT Authentication
- **Database:** MongoDB, Mongoose, NoSQL
- **APIs & Integration:** REST API, RESTful Services, GraphQL
- **Testing:** Jest, React Testing Library, Unit & Integration Testing
- **DevOps & Cloud:** AWS (EC2, S3, CloudFront), PM2, CI/CD (GitHub Actions)
- **AI Tools:** Cursor, Claude, ChatGPT, GitHub Copilot, Prompt Engineering
- **Tools & Workflow:** Git, GitHub, JIRA, Postman, VS Code, Agile, Scrum

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Bytes Technolab

Feb 2025 – Present

- Led development of a Next.js application from scratch, owning architecture planning, project setup, data-fetching strategy and end-to-end feature delivery.
- Improved application speed by 15% on an existing product through UI enhancements and performance optimization, lifting user experience and customer satisfaction.
- Mentored a team of 3 junior developers through code reviews, task breakdowns and guidance on React.js and Next.js best practices.
- Joined client calls to gather requirements, clarify scope, demo completed features and share progress updates.
- Used AI-assisted development tools (Cursor, Claude) with structured prompting to speed up coding, debugging and refactoring.
- Structured the codebase for scalability and maintainability, keeping delivery aligned with both technical and business goals.

Senior Systems Engineer — Infosys

Jul 2022 – Dec 2024

- Built scalable, maintainable web applications for enterprise clients using React.js, Redux, JavaScript, HTML, CSS and Tailwind CSS.
- Partnered with backend developers on REST API integration, contributing to a 20% improvement in overall system performance.
- Developed and tested features against client requirements within Agile delivery teams.

Junior Software Developer — Differenz System

May 2021 – Jul 2022

- Built responsive, interactive user interfaces with React.js, Material UI, HTML, CSS and JavaScript.
- Developed and maintained applications with a focus on usability, performance and clean, maintainable code.

KEY PROJECTS

Get Drivers Ed — Online Driver Education Platform

Full-stack e-learning platform offering state-approved online drivers ed, defensive driving and CDL prep courses for teens and adults across 15+ U.S. states.

- Built the frontend with Next.js and React.js, using server-side rendering for SEO-critical course, state and blog pages.
- Developed RESTful APIs with Node.js and Express.js in an MVC structure, using custom middleware for JWT authentication, validation and error handling across sign-up, course catalog, enrollment, lesson progress and completion certificates.
- Designed MongoDB schemas with Mongoose for users, courses, lessons, quizzes and enrollments, with indexes for fast course search by state and course type.
- Built interactive learning features: video lessons, quizzes, practice tests, a course-recommendation questionnaire and a referral rewards program.
- Deployed on AWS (EC2, S3, CloudFront) with PM2 process management and CI/CD pipelines for automated build and release.
- Wrote unit and integration tests with Jest and React Testing Library to keep releases stable.

Wedbush Securities — Financial Services Web Platform

Web platform for a Los Angeles–based financial services firm operating across Wealth Management, Investment Banking & Capital Markets, and Clearing & Execution.

- Developed responsive, data-rich UI modules in React.js and Tailwind CSS for the firm's financial services workflows.
- Managed complex application state with Redux to keep financial data consistent across screens.
- Integrated GraphQL APIs, shaping queries to each view so pages load only the data they need.
- Built reusable, accessible components to keep the interface consistent and reduce duplicate code.
- Delivered features in Agile sprints, tracking work in JIRA and collaborating through GitHub.

Gig Healthcare (GigHealth) — Travel Nurse Job Platform

Platform connecting travel nurses with high-paying job opportunities across the U.S.

- Designed and built the responsive web application from scratch using React.js, Context API and Material UI.
- Integrated REST APIs to power real-time job listings and the end-to-end application flow, from discovering roles to submitting applications.

- Structured shared state with Context API for seamless data flow across components, and optimized rendering for a smooth experience on desktop and mobile.
- Collaborated with cross-functional teams in Agile sprints using GitHub and JIRA.

Home Inspector Tech — Property Inspection Platform

Web platform that streamlines property inspection workflows for home inspectors.

- Developed core modules that let inspectors document defects, generate quotes and create final inspection reports.
- Managed inspection, defect and quote data with Redux to keep multi-step workflows consistent.
- Integrated REST APIs to save inspection data and generate client-ready reports.
- Built responsive layouts with Bootstrap for use across desktop and mobile devices.

EDUCATION

Master of Computer Applications (MCA) *2018 – 2021*

Nirma University, Ahmedabad · CGPA: 8.6 / 10

Bachelor of Computer Applications (BCA) *2015 – 2018*

Veer Narmad South Gujarat University · CGPA: 8.3 / 10

ACHIEVEMENTS

- **1st Place, Tech Kaushalya 2019** — state-level web development competition, Rollwala Computer College, Ahmedabad
- **Runner-up, Code'Go, iFest 2019** — competitive coding event, Institute of Technology, Nirma University

LANGUAGES

English, Hindi, Gujarati
